

Subject on a Page for Computing

Why you teach it - your purpose of study

At Audlem, we believe that children deserve a strong foundation & exposure to the digital world that they are growing up in that promotes knowledge, understanding and the safe navigation of online & digital forums. We link our teaching to the National Curriculum and teach computing via 3 key areas: Computer Science, Information Technology & Digital Literacy, Security & Safety

INTENT

What you teach - your programme(s) of study

As mentioned above, our intention is to teach the Computing curriculum via 4 key areas:

Computer Science:

Our Computer Science curriculum is continually reviewed & developed to ensure that all children are challenged and that relevant technologies are taught to children at an age-appropriate level. **This is continually evaluated to ensure technologies used are modern and relevant.**

Digital Literacy, Security & Safety:

As well as understanding how to use the online world effectively, a great deal of time is spent ensuring that children grow to be responsible online citizens. E-Safety has a large part of coverage at school along with the development of simple navigational skills to building of online resources. This part of our curriculum also includes communication aspects where we aim to teach children the value of presenting information using a variety of software services & applications effectively and efficiently. We aim to ensure that children are familiar with mainstream applications (such as the Microsoft Office Suite) as well as having an awareness of other programs, apps & resources that allow them to achieve their objectives.

Information Technology:

Collection of data from a variety of sources is an integral skill to develop when navigating the digital world. We aim to build on skills and experiences the children develop both in school and externally to ensure that they are furnished with the skills when completing their studies at Audlem.

IMPLEMENTATION

How you teach it - your delivery of the above

Computing is taught in all year groups throughout the year, both discreetly and through other subjects. Computer Science is primarily taught using the Lego We.Do.2 resource which is available to all classes on a timetabled half-termly basis. Digital Literacy, Security & Safety and Information Technology sessions occur during the remaining 5 half terms.

IMPACT

So what - your evaluations of the above

- All teaching is at least good and outstanding in some cases as evidenced by monitoring over time.
- All planning and teaching is underpinned by explicit learning objectives and success criteria and the suggested We.Do.2 projects are being used to teach coding in all year groups
- Teachers regularly and accurately assess subject specific resources and key skills in order to inform teacher planning and next steps for learning
- A cohesive progression based curriculum in ICT promoting continuity and progression is consistently in place across the whole school

On the scale below rate where you believe this subject currently stands in terms of your overall curriculum offer:
